

WeissKlang introduces the new L1 large-diaphragm condenser microphone

by [The Press Desk](#) 25th November 2022

Germany-based company WeissKlang releases the [L1 Large Diaphragm Condenser microphone](#) equipped with WeissKlang's newly developed capsule the WMK-1.

Welcome to the L1 - WeissKlang introduces its latest microphone

Murr (Germany), 25th November 2022 / Today WeissKlang Microphones starts the sale of the new "L1", a condenser microphone with large diaphragm, coming on the market with a very attractive price in addition to the reliable WeissKlang quality.

"This is a great day for WeissKlang, because the years of development of the L1 culminate today in the launch, opening a new chapter in our company history. We are pleased that we can offer our customers a microphone that is affordable and yet uncompromising in terms of quality," says Salvatore Di Fresco, founder and owner of the microphone manufacturer from Baden-Wuerttemberg in Southern Germany.

In addition to the detailed and natural sound, the L1 offers a very high resolution, a high dynamic range, an extremely low self-noise and thus the necessary flexibility for high-quality and breathtaking recordings of all kinds. Thanks to the latest transformerless semiconductor technology and the careful matching of all components, the L1 needs only 14 microseconds to capture a transient. Embedded in a high-quality body, the microphone impresses not only with its recording quality but also with its haptics.

WeissKlang is also breaking new ground in terms of environmental awareness with the L1 and delivers the microphone paperless (with the exception of the recyclable outer packaging). The documents included in the scope of delivery can be found in digital form on the included USB stick.

"But this can only be an intermediate step in our efforts to improve the ecobalance of our products. We are continuously working on a better environmental balance of our company and will also try to take further steps on this path in the future" says the company founder.

The L1 is suitable for a wide range of applications ranging from vocals and speech to instruments, and its affordable introductory price of 299 € (incl. worldwide shipping) addresses professional studios as well as ambitious home recorders.

The L1 is out now and available exclusively on the company's own website <https://www.weissklang.com>
